

**Leading Provider Of
Industrial Maintenance
And Cleaning Products**

History Of Armchem

Armchem International was founded by CEO Andrew Brahms in 1982 as a means to help him pay for his college education. Andy spent years travelling the world selling specialty cleaning chemicals, and realized he loved the idea of being able to provide specialty products he believed in coupled with world-class service. Andy became passionate about providing his clients with a happy, clean, and safe environment. Now, 39 years later, Armchem is a leading B2B distributor of industrial maintenance products. To this day, Andy's extremely personal and problem-solving style continues to be the foundation of the company.

Armchem embraces technology and science to create unique proprietary products while also

ensuring fast and economical delivery. However, we still believe that our personal touch is what sets us apart. Along with our products and services, we also provide each customer with a trained representative who personally visits the facility every month. This rep trains the facility's staff on our products and how to properly use them, guarantees the facility is stocked with all of the necessary supplies and is committed to lowering the facility's total operational costs.

We work with national and international businesses of any size, in any sector; including manufacturing, municipalities, restaurants, hotels, hospitals, schools, retail and more!

Industries We Focus On

- Industrial and commercial businesses
